

GAS PROSPECTING JUST GOT EASIER — AND MORE ACCURATE.

Weatherford[®]
LABORATORIES

INTRODUCING COMPREHENSIVE DATA PACKAGES FOR U.S. PETROLEUM BASINS

Weatherford Laboratories has assembled comprehensive data on 17 U.S. shale basins, encompassing some 2000 wells and over 25,000 samples. These packages screen each basin by county and region for thermal maturity, organic richness and mineralogy — and more basins are being added.

Unlike regional studies that take months or years to complete, our data packages are available *now*. What's more, there is no required contribution on your part, so your proprietary information stays secret.

Get up to speed quickly on an area. Become an expert overnight on a prospective play. Explore the possibilities without buying a lease, drilling a well, or taking time to test samples.

To learn more, visit weatherfordlabs.com/datapackages today. You could find more untapped gas windows tomorrow.

14 South Texas Eagle Ford Basin
